

P210

The Legendary Swiss Target Pistol

SWISS+
ARMS

The P 210 is a paradigm of experience, expertise and intuition. Components are synchronized with diligence. Machining tolerances are fine-tuned with skill. And great care is invested in the surface finish.

The P 210 is renowned for its solid quality, superior operation and unpretentious elegance. Indubitably a legend that transcends all borders, it epitomizes the very essence of Swiss short-rifle manufacturing. Reliability is assured. Quality and precision are unsurpassed.

Not only is the P 210 considered to be the world's finest single-action pistol, it is also one of the toughest 9 mm competition guns ever made. In production for more than half a century, it proves that perfection is timeless.

Originally developed as a Swiss army pistol in the 1940s, the P 210 is still made with uncompromising diligence and the finest quality materials by Swiss Arms, the oldest arms manufacturer in Switzerland.

The P 210 first gained fame as the weapon of choice among Swiss officers. Today it is a status symbol recognized throughout the world, from North America to the Middle East, for its constancy of performance and value.

Perfection cannot be created by machinery alone. Highly qualified gunsmiths ensure that each pistol adheres to the highest standards.

There's precision quality in every detail.

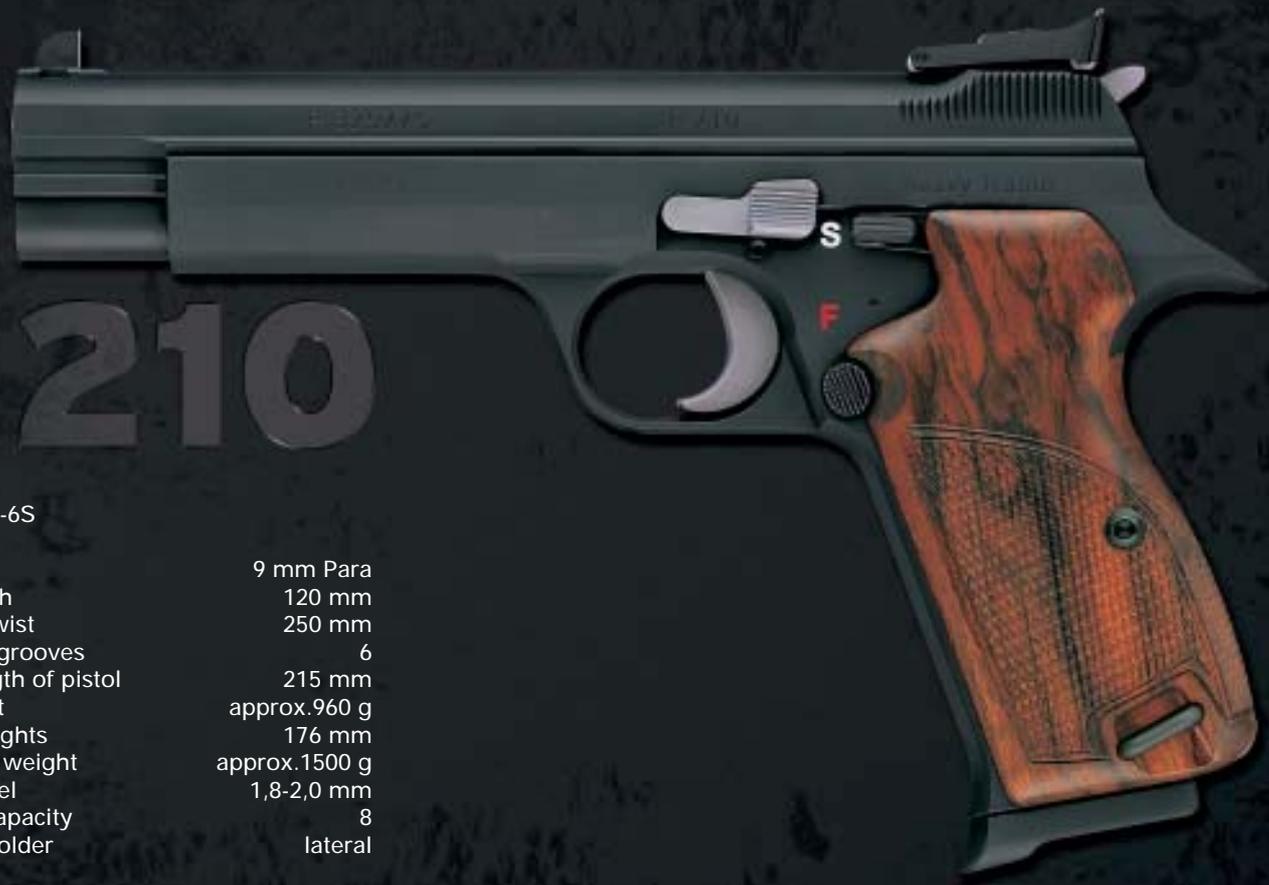

The P 210's new competition models – 5LS and 6S – have broadened the scope of this legendary pistol from conventional and precision shooting to more active applications. The lateral magazine catch holder, dynamic design of the magazine extension, and pronounced grip spur are indicators of this modern functionality.

Form follows function.
The design of the P 210 exemplifies
how perfection and a passion for
excellence make it possible for a
shooter to become one with their
weapon.

P210

Model P210-6S

Caliber	9 mm Para
Barrel length	120 mm
Length of twist	250 mm
Number of grooves	6
Overall length of pistol	215 mm
Total weight	approx. 960 g
Length of sights	176 mm
Trigger pull weight	approx. 1500 g
Trigger travel	1,8-2,0 mm
Magazine capacity	8
Magazine holder	lateral

The P 210 is made from a solid piece of high-grade, top quality steel. The heavy frame offers sufficient weight and resiliency to the grip.

P210

Model P210-5LS
with continuous 6" receiver

Caliber	9 mm Para
Barrel length	150 mm
Length of twist	250 mm
Number of grooves	6
Overall length of pistol	245 mm
Total weight	approx. 1110 g
Length of sights	214 mm
Trigger pull weight	approx. 1500 g
Trigger travel	1,8-2,0 mm
Magazine capacity	8
Magazine holder	lateral

Repeatable accuracy.

Micrometer sights operate with precision
accuracy and consistent reliability.

The P 210 zeros in at 50 meters.

Performance is unlimited.

P210

Model P210-6

Caliber	9 mm Para
Barrel length	120 mm
Length of twist	250 mm
Number of grooves	6
Overall length of pistol	215 mm
Total weight	approx.960 g
Length of sights	164 mm
Trigger pull weight	approx.1500 g
Trigger travel	1,8-2,0 mm
Magazine capacity	8

Solid function.

The legendary competition trigger of the P 210 uses a two-step system, which is fundamental to precision shooting.

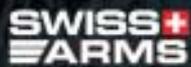

P210

Model P210-5

Caliber	9 mm Para
Barrel length	150 mm
Length of twist	250 mm
Number of grooves	6
Overall length of pistol	245 mm
Total weight	approx. 1010 g
Length of sights	214 mm
Trigger pull weight	approx. 1500 g
Trigger travel	1,8-2,0 mm
Magazine capacity	8
